OTOLARYNGOLOGIC
CLINICS
OF NORTH AMERICA

Cumulative Index 2005

Note: Page numbers of article titles are in **boldface** type.

A

Acoustic neuroma, and facial nerve,
anatomic relationships of, 703, 704
approach-specific surgical techniques in, 705–706
cerebrospinal fluid leakage in, 648–650
complications of, 648–650
expectant management in, 655
facial nerve preservation in, 647–648
fractionated stereotactic radiosurgery in, 667–668
gamma knife radiosurgery in, 660–667
accuracy of, 662–663
malignancy induced by, 663–665
protocol for, 662
tumor growth following, 666–667
general considerations in, 654–655
headache as complication of, 650
hearing preservation in, 645–646, 647
informed consent for management of, 653–654
meningitis as complication of, 650
microsurgical resection in, 655–659
approaches for, 656
bacterial meningitis following, 659
cerebrospinal fluid leakage in, 657–658
complications of, 656
facial nerve injury in, 658
headache and neck pain following, 658–659
hearing preservation in, 657
middle cranial fossa approach to, 644
retrosigmoid approach to, 644
stereotactic radiosurgery in, 660, 661
microsurgery in, and expectant management of, informed consent and, **653–670**
surgery in, facial nerve in, 701
methods of, 645
outcomes of, 645–648
surgical options in, counseling patients on, **643–652**
translabyrinthine approach to, 644

Adenocarcinoma, anterior skull base surgery in, 115–116
of maxilla, evaluation of, 110, 112

Adenoid cystic carcinoma, anterior skull base surgery in, 116–117

Adenoidectomy, in sinusitis in children, 506

Adhesives, for wound closure, 296–298

Aerodigestive tract, upper, squamous cell cancer of, sentinel lymph node biopsy in, 154–155

Airway, inflammation of, effect of fungal exposure on, 1204–1205
of infant, assessment of, case illustrating, 776
in skull base pathology, 776

Allergic fungal inflammation, 1204–1208

Allergic fungal rhinosinusitis. See *Rhinosinusitis, allergic fungal.*

Allergic fungal sinusitis, altered anatomy in, 536
image-guided surgery in, 485–486
with erosion of sinus cavity, 508, 509

Allergy(ies), and chronic rhinosinusitis, **1257–1266**
future directions in, 1264
possible mechanisms in, 1259–1260
prevalence of, 1258–1259
fungal, 1205
immunotherapy in, 1205–1206
in chronic rhinosinusitis, 1149–1150

Allergy medications, in chronic rhinosinusitis, 1360–1361

Alloderm, reconstruction of anterior skull base with, 138–139

Alloderm soft tissue implants, 363

American Academy of Otolaryngology Head and Neck Surgery, indications of, for computer-assisted endoscopic sinus surgery, 506, 507

0030-6665/05/$ - see front matter © 2005 Elsevier Inc. All rights reserved.
doi:10.1016/S0030-6665(05)00163-5

American Joint Committee on Cancer (AJCC), on staging of carcinoma of hypopharynx, 69
on staging of glottic cancer, 1–2
on staging of laryngeal carcinoma, 48–49
on staging of oropharyngeal cance, 64–65

Anesthesia, local, for office-based procedures, in rhinosinusitis, 1327–1329

Aneurysmal bone cyst, and skull base fibrous dysplasia, 788

Aneurysmal disease, of skull base, 765–767

Aneurysm(s), mid-basilar, symptomatic, 765, 766

Angiofibroma(s), anterior skull base surgery in, 118
juvenile, nasal, 762
classification of, 760–761
Fisch, 761
Radowski surgical staging system for, 761
nasopharyngeal, 760, 784
endoscopic surgery in, techniques for, 786–787
staging system for, 784
surgical approaches for, 784–785

Antibiotics, in acute sinusitis, 1312
in chronic rhinosinusitis, 1302–1305

Antifungal agents, in chronic rhinosinusitis, 1305
topical, role of, 1210–1211

Antifungal therapy, in chronic rhinosinusitis, 1354–1355

Antihistamines, in chronic rhinosinusitis, 1306

Anti-inflammatory approach, to treatment of chronic rhinosinusitis, **1351–1365**

Antileukotriene therapy, in chronic rhinosinusitis, 1357–1358

Antrostomy, maxillary, with rhinosinusitis, office-based procedures in, 1334–1335

Arteriovenous fistulas, dural, anterior cranial fossa, 751
arterial embolization in, with tissue adhesive, 747–749
arterial supply of, 743–744
carotid cavernous fistulas, 751–753
classification of, 744, 745
definition of, 743
endovascular treatment for, 746–747
higher grade, 750
lower grade, 748
sinus occlusion of, with coils, 749–751
tentorial, 751
Type I, 744
Type IIa, 745–746
Type IIb, III, and IV, 746
Type V, 746

Artery(ies), ventebral, symptomatic stenosis of, 766, 768

Artificial tears, in dry eye, 879–880

Arytenoid adduction, 813

Aspirin, eosinophilic chronic rhinosinusitis exacerbated by, 1352

Asthma, in chronic rhinosinusitis, 1149–1150
rhinitis therapy in, 1352
superantigens and, 1225

Atherosclerotic disease, symptomatic, and arterial dissections, 767–768

Auditory brainstem implants, history of, 262
technology and outcomes of, 262–263

Auditory nerve, in neurofibromatosis Type 2, 262

Auricular nerve, course of, 715, 716

Auricular reconstruction, tissue engineering in, 208–209

Autofluorescence, of lesions of oral mucosa, 222

Autologen, as soft tissue filler, 365–366

Autonomic nervous system, dysfunction of, and sinonasal disease, 1157–1159

B

B-Lymphocytes, effect of superantigens on, 1222

Bacteria, recovery from sinuses in sinusitis, discrepancies in, 1176–1177
role in chronic rhinosinusitis, **1171–1192**

Balloons, detachable, for embolization in head and neck, 743

Bioengineering, and classical engineering
principles, interaction of, 186
definition of, 187
introduction to, **185–197**
sample projects in, 190–196
solutions, for hearing loss and related disorders, **255–272**
subdisciplines of, 187–190

Biofilm(s), bacterial, and sinusitis, 1196–1199
basics of, 1195–1196
in chronic sinusitis, **1193–1201**
future perspectives on, 1199–1200
description of, 1194
detection of, 1194–1195

Biofusionary, for wound closure, 301–302

Bioinformatics, in otolaryngology, **321–332**
future prospects in, 328–329
microarray technology and, 322–323
techniques of, for microarray analysis, 323–324

Biomechanics, 189–190

Biomedical imaging science, 188

Biomimetics, 281

Bion microstimulator, in tinnitus, 268

Biophotonics, 215–216

Bipolar scissors, applications of, 398–399
complications of, 399
description of, 398

Blepharophimosis syndrome, 922–923

Blepharoplasty, brow position and, 1012
complications of, 1013–1018
diagnosis and management of, **1009–1021**
prevention of, 1011–1013
following coronal eyebrow lift, 973
in African-American patients, 866
in Asian patients, 865–866
in males, 865
in thyroid orbitopathy, 1068
lower lid evaluation for, 1012–1013
patient evaluation for, 1011
reconstructive, **985–1007**
surgical planning for, 1012
techniques of, for lower eyelids, 999–1006
for upper eyelids, 992–998
transconjunctival, 999–1000, 1001
upper eyelid crease and, 1012

Blepharospasm, and facial rhytidosis, botulinum toxin in management of, **887–902**
essential, botulinum-A toxin in, 1081
clinical features of, 1075–1078, 1079
description of, 1075, 1076
differential diagnosis of, 1078
myectomy in, 1081, 1083–1085
alternative full upper, 1089, 1090
botulinum toxin after, 1094
full upper, 1085–1089, 1090
limited upper, 1090–1092
lower, 1092–1094
peripheral facial neurectomy in, 1082–1083
pharmacotherapy of, 1081
surgical management of, **1075–1098**
complications of, 1095–1096
therapy of, 1080

Blood vessels, injury to, during surgical procedures of neck, 801–803

Blue sky technique, endoscopic craniofacial resection with, 140–142

Bone, complications of, in chronic rhinosinusitis, 1145
fine detail of, CT to evaluate, 1279–1281

Bone-anchored hearing aids, history of, 264–265
indications for, 265–266
outcomes of, 266
technology of, 265

Bone cyst, aneurysmal, and skull base fibrous dysplasia, 788

BoneSource, 367

Botulinum-A toxin, in essential blepharospasm, 1081

Botulinum toxin, adverse effects of, 900
after myectomy in essential blepharospasm, 1094
and facial rhytidosis, 895, 897–900
and facial spasm, 889
in benign essential blepharospasm, 890–892
in hemifacial spasm, 892–892
in management of upper facial rhytidosis and blepharospasm, **887–902**
injection of, anesthesia for, 889
pharmacology of, 888
storage of, 888–889

Bovine collagen, as soft tissue filler, 364

Brachytherapy, and external beam radiation, in cancer of base of tongue, 77–78
interstitial, description of, 372–373
high-dose-rate, 373–374
low-dose-rate, 373

Brain functional imaging, portable, using near-infrared light, 190–193

BrainLAB VectorVision system, 425

Brueghel's syndrome, 1076, 1077

C

Caldwell-Luc procedure, 429

Cancer, diagnosis and treatment of, nanomedicine and, 285–286
glottic. See *Glottic cancer.*
of base of tongue. See *Tongue, cancer of base of.*
of head and neck. See *Head and neck, cancer of.*
of mouth, 215

Candidiasis, erythematous, 30–31
oral, 30–31
pseudomembranous, 30

Canthal angle, lateral, assessment of, for facial rejuvenation, 863

Canthal tendon(s), lateral, and medial, 845–846, 847, 1033–1034
plication of, 1001–1002, 1003
laxity of, determination of, for facial rejuvenation, 864

Carcinoma, laryngeal, advanced, management options in, surgical and non-surgical, **47–57**
squamous cell. See *Squamous cell carcinoma.*
verrucous, 24–25

Cardiovascular research, bioengineering and, 188

Carotid artery, injury to, during ear surgery, 718–719

Catecholamine secreting tumors, 797–798

Cell-based therapies, and tissue engineering, **199–214**

Cerebrospinal fluid, circulation of, proposed pathways of, 572, 573
detection of, 584–586
drainage of, and shunting, historical overview of, 578–579
indications for, and avoidance of complications, **577–582**
external lumbar drainage of, 579
flow of, anatomy and physiology of, 570–574
formation of, circulation and absorption of, sites of, 570, 571
outflow pressure and, 573
functions of, 569
leakage of. See *Cerebrospinal fluid leaks.*
metabolism of, and intracranial pressure homeostasis, principles of, **569–576**
otologic, leak of, diagnosis and management of, **583–595**
physiology of, 577–578
secretion of, by choroid plexus, 570, 572

Cerebrospinal fluid leaks, cause of, 597–598
conservative management of, 601–602
endoscopic surgery in, 603–605
fascia-bone-fascia graft in, 590
in acoustic neuroma, 648–650
in children, endoscopic manaagement of, 791–792
in microsurgical resection of acoustic neuroma, 658–659
in surgery of neck, 805–806
localization of, 599–601
lumbar drain in, 602
navigational systems for repair of, 520, 521
nontraumatic, spontaneous, 586–590
options for management of, in anterior skull base surgery, 122–124
packing of, 605
repair of, follow-up in, 606
revision surgery for, computer-assisted surgery in, 477
routes of, from tegmen defects, 587
sealant in, 605
signs and symptoms of, 598–599
surgical management of, 602–606
complications of, 606
extracranial, 603
transnasal, 603
traumatic, due to wound, 592
in blunt or penetrating trauma, 591–592
postsurgical, 592
rhinorrhea in, 592–593

Cerebrospinal fluid rhinorrhea, diagnosis and management of, **597–611**
postsurgical, prevention of, 606–607

Cervical malignant lymphadenopathy. See *Lymphadenopathy, cervical, malignant.*

Chemoradiation therapy, in oropharyngeal cancer, 66

Chemotherapy, and radiation, for organ-preservation therapy in cancer of base of tongue, 79–82
and radiotherapy, in carcinoma of hypopharynx, 70–71
in malignant cervical lymphadenopathy, 93

Child(ren), cerebrospinal fluid leaks in, endoscopic manaagement of, 791–792
choanal atresia in, 507
computer-assisted functional endoscopic sinus surgery in, **505–513**
consensus panel guidelines for, 505, 506
indications for, 506–509
surgical procedure for, 510–512
pituitary lesions in, endoscopic approaches to, 790–791
sinusitis in, adenoidectomy in, 506
medical management of, 505
surgical management of, 505–506
skull base of, diagnostic and surgical challenges in, **773–794**
studies of microbiology of chronic rhinosinusitis in, 1183–1184
Wegener's disease in, 508

Choanal atresia, in child, 507
surgical approaches in, 779–780

Chondrosarcoma, CT in, 1288, 1289

Chordoma, anterior skull base surgery in, 117–118
clival, image-guided resection of, 485

Churg-Strauss syndrome, chronic rhinosinusitis and, 1271–1272

Clarithromycin, in chronic rhinosinusitis, 1342, 1348

Coblation, applications of, 400–402
complications of, 402
description of, 399–400

Cochlear implants, electro-acoustic, history of, 261
technology and outcomes of, 261–262
external and internal components of, 256–257
history of, 255–256
indications for, 257–258
outcomes of, 258–260
quality of life and cost effectiveness of, 260
surgical procedure for, 258
technology of, 256–257

Collagen-based devices, for wound closure, 298

Computational biology and bioinformatics, 189

Computed tomography, and MR imaging, of paranasal sinuses, **1279–1299**
data set development and, 421–422
data set volumes registration and, 422
for assessment of fibroosseous lesions of paranasal sinuses, 1288
helical multidetector, 308–309, 310
high-resolution, for post-hoc analyses, 1295–1296
high-resolution coronal and axial, in cerebrospinal fluid leaks, 600
in pathology of skull base, 614–619
integrated, and linear accelerator system, 387–389
multidetector row, 1296
of head and neck, 308, 309, 310, 318
positron emission tomography combined system, 385–387
sagittal view, 1296–1297
to evaluate fine detail of bone, 1279–1281

Computed tomography angiography, in pathology of skull base, 617–618

Computed tomography cisternograms, in cerebrospinal fluid leaks, 600

Computed tomography perfusion studies, in pathology of skull base, 618–619

Computed tomography staging, challenges in, in sinus disease, 432–433

Computed X-ray tomography, of paranasal sinuses, 430

Computer-assisted endoscopic sinus surgery, indications for, American Academy of Otolaryngology Head and Neck Surgery and, 506, 507

Computer-assisted functional endoscopic sinus surgery, in children, **505–513**
consensus panel guidelines for, 505, 506
indications for, 506–509
surgical procedure for, 510–512

Computer-assisted navigational system(s), in revision endoscopic sinus surgery, **473–482**

Computer-assisted sinus surgery, domain of, 439–440

Computer-assisted surgery. See also *Image-guided surgery*.
experience with, 475–478
history of, 474
in frontal sinus disease, 476
in revision ethmoid surgery, 475
in revision surgery for cerebrospinal fluid leak, 477
intraoperative magnetic resonance imaging with, 478–479, 480
limitations of, 478
revision surgery for chronic sinusitis after, 478
use in sinonasal procedures, 474–475

Computer-assisted surgical navigation, future of, 420
improvements needed in, 419
stereotactic, **535–539**

Computers, personal (PC), interactive imaging and, 422

Conjunctivodacryocystorhinostomy, endoscopic, 1104–1105

Cornea, complications of, following blepharoplasty, 1015–1016

Corticosteroids, topical nasal, in chronic rhinosinusitis, 1302

Cranial nerve IX, injury to, in surgical procedures of neck, 799–800

Cranial nerve V, injury to, in surgical procedures of neck, 798

Cranial nerve VII, injury to, in surgical procedures of neck, 798–799

Cranial nerve VIII, injury to, in surgical procedures of neck, 799

Cranial nerve X, injury to, in surgical procedures of neck, 800

Cranial nerve XI, injury to, in surgical procedures of neck, 800–801

Cranial nerve XII, injury to, in surgical procedures of neck, 801

Craniofacial resection, anterior, endoscopic-assisted, 134
for esthesioneuroblastoma, 134, 135
without craniotomy, 136–138
in skull base tumors, 133–134
endoscopic, with blue sky technique, 140–142

Craniotomy, endoscopic-assisted anterior craniofacial resection without, 136–138

CT-MRI fusion, 424–426

Culture collection, endoscopic, in middle meatus, 1175

Cyanoacrylates, for wound closure, 296–297

Cymetra, as soft tissue filler, 366

Cytokines, proinflammatory, produced in nasal polyposis, 1246–1248

D

Dacryocystorhinostomy, and decompression of optic nerve and orbit, image guidance for, 545–547
endoscopic, 495–496, 497, 498, 499, 521, 1102–1104

Decongestants, in chronic rhinosinusitis, 1305–1306

Dermalogen, as soft tissue filler, 366

Dermatitis, atopic, superantigens and, 1223–1225

Dermoids, nasal, surgical approaches to, 781

Diabetic patients, neuropathy in, shoe sole for prevention of, 193–196

Diffusion-weighted imaging, 314

Distraction osteogenesis, future of, osteoplastic surgery and, 357–359
in craniofacial skeleton, **333–359**
of mandible, 336–347
case studies of, 347–352, 353
of maxilla and cranium, 353–356
case study of, 356–357, 358
overview of, 333–334
physiology of, 335–336
three phases of, 335

DNA, in nanotechnology, 281

Draf 3 procedure, for endoscopic sinus image-guidance, 466, 467

Drain, lumbar subarachnoid, in anterior skull base surgery, 125

Dry eye, diagnosis of, 875–879
and management of, **871–885**
disorders of, pathogenesis of, 873–874
examination of patient with, 878–879
history taking in, 875–878
pathways of, 874–875
treatment of, 879–883

Dynamic contrast-enhanced magnetic resonance imaging, 312–313

Dysphagia, and dysphonia, treatment of, following skull base surgery, **809–817**

Dysphonia, and dysphagia, treatment of, following skull base surgery, **809–817**

E

Ear canal, dehiscenses of, during ear surgery, 720–721

Ear surgery, chronic, iatrogenic complications from, **711–722**
dehiscences of ear canal during, 720–721
facial paralysis as complication of, 711–717
injuries to tegmen during, 719–720
injury to carotid artery during, 718–719
injury to jugular bulb during, 718
vascular injuries in, 717–719

Ectropion, and entropion, correction of, techniques for, **903–919**
causes of, 910–911
definition of, 910
pathophysiology of, 911
surgery in, Eliasoph three-dimensional canthal correction in, 915–917
horizontal shortening in, 912–913
lateral canthal correction in, 914
lateral canthal suspension in, 914, 915, 916–917
medial spindle excision in, 914
treatment of, 911

Elastin, for wound closure, 298

Electrocautery, monopolar, 397–398

Electromyography, in tumors of skull base, 812

Electron conformal radiotherapy, 383–385

Encephalocele(s), bony skull base defects in, image-guided surgery in, 485, 488, 489
MR imaging to evaluate, 1282, 1283
nasal, surgical approaches to, 780, 782

Endoscopic lacrimal surgery, **1099–1107**

Endoscopic sinus surgery. See *Sinus surgery, endoscopic.*

Endoscopy, laser-induced fluorescence, in lesions of oral mucosa, 224
nasal, diagnostic, as office-based procedure, in rhinosinusitis, 1330–1331

Energy-based wound closure, 298–301

ENTrak Plus system, 458

Entropion, and ectropion, correction of, techniques for, **903–919**
causes of, 905
cicatricial, 910
congenital, 905
lower lid, 906
treatment of, 907–908
pathophysiology of, 906
surgery in, external fabrication of retractors in, 909
Feldstein suture procedure for, 908
horizontal suture repair in, 908–909
orbicularis redirection procedures for, 909
tarsal excision in, 909–910
treatment of, 906–907
upper lid, treatment of, 907

Eosinophilia, stromal, ulcerative granuloma with, 31–32

Eosinophils, electrophysiology of respiratory surface epithelium and, 1248–1250

Epistaxis, control of, nasal endoscopy with, in rhinosinusitis, office-based procedures in, 1334

Erythroleukoplakia, 23–24

Erythromycin, in chronic rhinosinusitis, 1303, 1304–1305, 1339, 1341, 1342

Erythroplakia, 23–24

Esophagus, carcinoma of, photodynamic therapy in, 251–252

Esthesioneuroblastoma, anterior skull base surgery in, 116–117
CT in, 1286, 1287
endoscopic-assisted anterior craniofacial resection for, 134, 135

Ethanol, for embolization in head and neck, 742

Ethmoid sinuses, 831

Ethmoid/sphenoid junction, posterior, for optic decompression, 500, 501

Ethmoid surgery, revision, computer-assisted, 475

Extracranial stereotactic radiotherapy, 381–382

Extraocular muscles, 836–839

Eye(s), chronic irritation of, causes of, 876–877
dry. See *Dry eye*.
mucous layer of, 872
surface of, tear film and, 872

Eyebrowpexy, transblepharoplasty, 960–961

Eyebrow(s), and eyelashes,
micropigmentation of, 1006
and forehead, anatomy of, 951–954
coronal lift of, 969–973
elevation procedures of, 954–961
endoscopic or small incision lift of, 959–960
lifts of, operative procedures for, 961–980
ptosis of, 947, 948
comprehensive management of, **947–984**
patient evaluation in, 949–951
and forehead of, open coronal lift of, 958–959
direct lift of, 955–956, 961–963
in paralytic eyebrow, 956, 957
surgical technique for, 961–963
enhancement of, principles of, 992–1006
internal pexy of, 979–980, 981, 982, 983
lifts of, complications of, 981–983
measurement of, for facial rejuvenation, 862
midforehead lift of, 957–958, 966–968
surgical technique for, 966–968
orbicularis plication lift of, 956–957, 964–965, 966
surgical technique for, 965
paralytic lift of, 963–964
surgical technique for, 963–964
structure and position of, 948–949
suborbicularis, fat pocket of, facial rejuvenation and, 862
temporal lift of, 958, 968–969
surgical technique for, 968–969

Eyelashes, and eyebrows,
micropigmentation of, 1006
enhancement of, principles of, 992–1006

Eyelid(s), ablative laser resurfacing of, 1004–1005
anatomy of, 1010–1011
contour irregularities of contour of, facial rejuvenation and, 863
hygiene of, in dry eye, 881–882
left upper, 843, 844
lower, anatomy and function of, 1033–1034
blepharoplasty surgical techniques, 999–1006
complications of, following blepharoplasty, 1017–1018
reconstruction of, **1033–1042**
direct closure for, 1034–1035
with canthal release, 1035–1039
grafts for, 1039–1041
semicircular advancement with canthal release, 1037
techniques for, 1034–1041
tissue advancement for, 1035–1036
transpositional flap for, 1037–1039
repair of, principles of, 988–992, 993, 994, 995
trichloroacetic acid peels of, 1005
margin of, and punctal malpositions, facial rejuvenation and, 864
opening of, apraxia of, 1080, 1094–1095
structures of, 842–847
topography of, 843, 844
upper, blepharoplasty surgical techniques, 992–998
complications of, following blepharoplasty, 1016–1017
defects of fifty percent or less, repair of, 1023–1025
defects of fifty to seventy-five percent of, repair of, 1025–1026, 1027
defects of seventy-five percent or more, repair of, 1026–1030
lipovaporization of, 994–995
reconstruction of, **1023–1032**
Cutler-Beard technique for, 1026–1030
goals and principles of, 1023
modified Hughes tarsoconjunctival repair for, 1029, 1030–1031
surgical techniques for, 1023–1031
repair of, principles of, 985–988, 989, 990, 991, 992
skin resection, 992–994, 996

F

Face, midfacial pain in, 1319–1320
vascular lesions of, advances in treatment of, 242–248

Facial fat, anatomic aspects of, 1119–1120
injectable phosphatidylcholine in, 1121–1122
localized, treatments available for, 1120–1121

Facial lifting, with "APTOS" threads:
featherlift, **1109–1117**
material and methods for, 1110, 1111–1114
results and discussion of, 1112, 1113, 1114, 1115, 1116–1117
surgical technique for, 1112, 1113, 1114–1115

Facial nerve, anatomic preservation of, in acoustic neuroma surgery, 701–702
anatomy of, 712
and acoustic neuromas, anatomic relationships of, 703, 704
approach-specific surgical techiques in, 705–706
anterior rerouting of, degrees of, 688–689
historical perspective on, 686–688
long technique of, 689, 693–696
dissection of, technical aspects of, 703–705
in acoustic neuroma surgery, 701
injury to, in microsurgical resection of acoustic neuroma, 658–659
intracranial repair of, 707
intraoperative monitoring of, 713
intratemporal anatomy of, 685–686
posterior rerouting of, function following, 697–699
historical background of, 689–690
outcomes of, 691–701
technique of, 690–691
rerouting of, functional preservation in, 702–703
in skull base surgery, **685–710**
transection of, 713–714
nerve graft in, 714–715

Facial pain, causes of, 1312
endoscopic sinus surgery in, 1314
sinogenic, diagnosis and management of, **1311–1325**
sinusitis and, 1311, 1312

Facial paralysis, as complication of ear surgery, 711–717

Facial rejuvenation, classification of skin types and levels of photodamage for, 866–867
devising surgical plan for, 867–869
patient evaluation for, **857–869**
patient preparation for, 858–859
patient selection for, 857–858
preoperative measurements and observations for, 860–867
preoperative medical evaluation for, 859–860

Facial skeleton, tissue engineering in, 210–211

Fasanella-Servat procedure, 998–999

Fascia-bone-fascia graft, in cerebrospinal fluid leaks, 590

Fat transposition, transconjunctival, 1000–1001, 1002

Fenwal thermister, 194

Fibered platinum microcoils, for embolization in head and neck, 739–740

Fibrin, hemostatic protein, for wound closure, 297–298

Fibro-osseous lesions, of skull base, management of, 787–789

Fibrous dysplasia, of skull base, aneurysmal bone and, 788

Fibrous dysplasis, CT in, 1290–1291

Fine-needle aspiration, in thyroid carcinoma, 162–164

First-bite syndrome, following surgery of neck, 806–807

FlashPoint 5000 three-dimensional optical localizer, 455

Fluorescein, intrathecal, in cerebrospinal fluid leaks, 600–601

Fluorescence, in lesions of oral mucosa, 220–224
induced, of oral mucosa, 224–225

Fluorescence endoscopy, laser-induced, in lesions of oral mucosa, 224

Fluorodeoxyglucose, normal distribution of, 626

Fluorodeoxyglucose-positron emission tomography, in diagnostic evaluation of unknown primary tumor, 89–90

Fluoroscopy, 307
intraoperative, images during, limitation of, 559, 560

Foramina, and anterior lacrimal crest, 827, 828

Forehead, and eyebrow, anatomy of, 951–954
coronal lift of, 969–973

Forehead (*continued*)
elevation procedures of, 954–961
endoscopic or small incision lift of, 959–960
lifts of, operative procedures for, 961–980
open coronal lift of, 958–959
ptosis of, 947, 948
comprehensive management of, **947–984**
patient evaluation in, 949–951
endoscopic lift of, 974–978
surgical technique for, 975–978
lift of, current practice trends in, 961
open coronal lift of, pretrichial incision variation of, 973–974
subperiosteal plane central dissection variation of, 974

Fractionated stereotactic radiotherapy, 382

Fractionation radiotherapy, accelerated, hyperfractionation and, 374–375, 376–377

Framed stereotaxy, 420

Frameless stereotactic computer systems, 420–422, 424

Frictional keratosis, 32

Frontal sinus, management of, in anterior skull base surgery, 124

Frontal sinus drillout procedure, 466, 467

Functional endoscopic image-guided sinus surgery, 439, 448–449, 453, 456, 457–458, 459

Fungal allergies, 1205
immunotherapy in, 1205–1206

Fungal inflammation, allergic, 1204–1208
nonallergic, 1208–1209

Fungus(i), charateristics of, 1203–1204
exposure to, inflammation of airway and, 1204–1205
role in chronic rhinosinusitis, **1203–1213**

Fusion technology, and use of static preoperative images, 558–559
of navigational systems, 556–558

G

Gamma knife radiosurgery, in acoustic neuroma, 660–667

Gastroesophageal reflux disease, chronic rhinosinusitis and, 1257

Gelatin sponge, absorbable, for embolization in head and neck, 741

Gliomas, nasal, surgical approaches to, 781–782

Glomus jugulare tumor, 759–760

Glomus tumors, temporal, classification of, 754–756
de la Cruz, 756
Fisch, 754, 755
Glasscock and Jackson, 755

Glossopharyngeal nerve, 809

Glottic cancer, early, transoral laser excision in. See *Laser excision, transoral.*
early T1, treated by radiotherapy, local control and surgical salvage for, 3
early T2, treated by radiotherapy, local control and surgical salvage for, 3
endoscopic management of, 16–17
radiation in management of, side effects of, and morbidity associated with, 4–5
staging of, 1–2
American Joint Committee on Cancer (AJCC) on, 1–2
T1 and T2, local control and cure of, 2–3
radiation in management of, **1–9**
and transoral laser excision, cost of, compared, 5–6
selection criteria for, 7
voice quality following, 4
treatment of, 52

Gore-Tex soft tissue implants, 362–363

Granuloma, ulcerative, with stromal eosinophilia, 31–32

Granulomatous diseases, chronic rhinosinusitis and, **1267–1278**
work-up and management in, 1277
diagnostic tests for, 1276

Graves' orbitopathy. See *Thyroid orbitopathy.*

H

Harmonic scalpel, applications of, 403–405
complications of, 405
description of, 402–403

Harvard staging system, in sinus disease, 432

Hashimoto's thyroiditis, 163

Head and neck, cancer of, imaging and diagnostic techniques in, 385–390
initial staging of, 627
microarray analysis in, 325–327
sentinel lymph node biopsy in, **145–160**
lymphatic anatomy and, 150–151
treatment of, radiation therapy techniques for, **371–395**
computed tomography of, 308, 309, 310, 318
embolic agents used in, 739–743
imaging of, advances in, **307–319**
lymphatic mapping in, 147
magnetic resonance imaging of, 310–315
positron emission tomography of, 315–317
tumors of, nuclear medicine in, 315–318

Head-tracking devices, 421, 423–424

Headache, and neck pain, following microsurgical resection of acoustic neuroma, 658–659
as complication of acoustic neuroma, 650

Hearing, preservation of, in microsurgical resection of acoustic neuroma, 658–659

Hearing aids, bone-anchored. See *Bone-anchored hearing aids.*

Hearing loss, and related disorders, bioengineering solutions for, **255–272**
future technology directions in, 268–269

Heat-mediated fusion, nonlaser, for wound closure, 300–301

Helical multidector computed tomography, 308–309, 310

Horner's syndrome, 926, 927–928

Hughes procedure, for lower eyelid reconstruction, 1037–1039

Human Genome Project, 321

Humidifiers, in dry eye, 882

Hürthle cell carcinomas, 165

Hyaluronic acid, as soft tissue filler, 364–365

Hydrogels, in situ-forming, in tissue engineering, 206, 207

Hydroxyapatite, as soft tissue filler, 367

Hyperfractionation, and accelerated fractionation radiotherapy, 374–375, 376–377

Hypoglossal nerve, deficit of, treatment of, 814
skull lesion and, 810

Hypopharynx, and oropharynx, squamous cell carcinoma of, **59–74**
carcinoma of, 67–68
chemotherapy and radiation therapy in, 70–71
clinical presentation of, 68
evaluation and staging of, 68
staging of, American Joint Committee on Cancer on, 69
surgical therapy of, 69
reconstruction following, 70
surgical anatomy of, 66

Hypophysectomy, transphenoidal, images for navigation during, 557

I

Image-guidance, for surgery of orbit, **491–503**

Image-guided procedures, of skull base, **483–490**
clinical uses of, 484–486
surgical technique for, 486–490

Image-guided radiotherapy, 390

Image-guided sinus surgery, **439–452**
accuracy of, 454–458
and cost analysis of, **453–460**
clinical outcome and, 533
cost of, 458–459
enhancement of confidence with, 531–532
equipment for, complexity of, 532
frontal sinus, **461–471**
approaches for, 464–466
external approaches for, 467–470
headset for, 463
and hand-held probe for, 463, 464
systems for, 462–464
functional endoscopic, 439, 448–449, 453, 456, 457–458, 459
future of, 424–427
historical perspective on, **419–428**
in advanced disease, 529–530
in intermediate disease, 528–529
indications for, 537
introduction of surgeons to, 531

Image-guided sinus (*continued*)
late 1980s to present, 422–424
limitation of, 450–451
operative time and expense in use of, 531
patient selection for, 527–530
practical considerations in, **527–534**
practical guidelines for use of, 530–533
precautions in use of, 532–533
registration in, 440–445
automatic, 442–443
contour-based, 443
error in, 443–445
paired-point, 442
protocols for, 442
system components for, 445–448
systems for, accuracy of, 531

Image-guided surgery, real-time
intraoperative imaging in, 422
stereotactic, 439, 453–454. See also *Image-guided sinus surgery*.

Image-guided system(s), glions in, 516, 517
ideal, 552
impact of, on sinus surgery, **515–525**
in routine endoscopic sinus surgery, 517–518
uses of, 517–518

Imatinib, in chronic rhinosinusitis, 1361

Immunomodulators, in chronic rhinosinusitis, 1306, 1361–1362

Immunostimulants, in chronic rhinosinusitis, 1306

Immunotherapy, in chronic rhinosinusitis, 1359–1360
in fungal allergies, 1205–1206

Infant(s), airway of, assessment of, case illustrating, 776
in skull base pathology, 776

Infection, prevention of, interfering flora in, 1177

Infectious agents, in chronic rhinosinusitis, 1146–1147

Infectious diseases, chronic rhinosinusitis and, 1274–1275

Inferior turbinate hypertrophy, coblation for, 401

Inflammation, in chronic rhinosinusitis, 1147–1148

Inflammatory disease, of sinuses, CT guidance in surgery of, 539–541

Informed consent, for management of acoustic neuroma, 653–654

Infrared spectroscopy, of oral mucosa, 225–226

Infratemporal fossa, parapharyngeal space, and neck, surgery of, avoiding pitfalls of, **795–808**

International Society for Computer-Aided Surgery (ISCAS), 439

International Union against Cancer (UICC), classification of laryngeal carcinoma and, 47, 48–49

Intracranial complications, in chronic rhinosinusitis, 1146

Intracranial pressure, physiology of, 574–575

IntraTrak 3500 (VTI), 458
for intraoperative guidance, 481

IntraTrak system (GE), 421, 454, 458

Inversion recovery magnetic resonance imaging, 310–311

Isolagen, as soft tissue filler, 365

J

Jugular bulb, injury to, during ear surgery, 718

K

Kennedy staging system, in sinus disease, 431

Keratosis, frictional, 32
tobacco-pouch, 27

L

Lacrimal gland(s), 848
accessory, 848
drainage of, 849–852
secretion of, 872–873
suspension of, 996, 997

Lacrimal sac, anatomy of, 491–492
endoscopic dacryocystorhinostomy of, 495, 497

Lacrimal surgery, endoscopic, **1099–1107**
advantages of, 1101
complications of, 1106–1107
indications for, 1101
postoperative care following, 1106
preoperative evaluation for, 1099–1101
surgical techniques in, 1102–1105

Lacrimal system, 848–852

Lagophthalmos, following ptosis surgery, 944

Lamella, anterior, 842–843
anterior and posterior, 1034

Lamina papyracea, computed tomography scan of, 492, 495
guided imaging to identify, 508

LandmarX Element ENT Image-Guided Surgery System, 458

LandmarX Evolution Plus ENT Image Guidance System, 458

LandmarX system, 424, 457, 458

Laryngectomy, supracricoid partial, contraindications to, 51
in laryngeal cancer, 14–16
in laryngeal carcinoma, 50
supraglottic, in laryngeal cancer, 13–14
open, in laryngeal cancer, 13
total, in laryngeal cancer, 11
vertical partial, in laryngeal cancer, 12–13

Larynx, cancer of, endoscopic laser approaches to, 16–18
carcinoma of, advanced, management options in, surgical and nonsurgical, **47–57**
classification of, 47
curative treatment in, 50–53
glottic, endoscopic management of, 16–17
treatment of, 52
intermediate size, T2 and T3, organ preservation surgery for, **11–20**
nonsurgical managemennt of, 53–55
palliation in, 49–50
prognosis in, 55
staging of, American Joint Committee on Cancer (AJCC) on, 48–49
subglottic, treatment of, 52–53
supracricoid partial laryngectomy in, 50
supraglottic, bilateral neck treatment of, 53
endoscopic management of, 17–18
treatment of, 51–52
T3 N0 disease, treatment of, 51–52
T4 N0 disease, treatment of, 52
treatment of, 49
small lesion of, treatment with radiation alone, **1–9**
three regions of, 47–48
tissue engineering of, 209–210

Laser(s), for treatment of port-wine stains, therapeutic mechanisms of, 243–244
types of, 244–245
light of, interaction with skin tissue, in port-wine stains, 242–243

Laser-based therapies, selected, **241–254**

Laser excision, transoral, in early glottic cancer, 1, 2–3
convenience of, 6
results of, 4
salvage potential of, 6
selection criteria for, 7

Laser resurfacing, ablative, of eyelid, 1004–1005

Laser surgery, endoscopic, in laryngeal cancer, 16–18

Laser tissue welding, for wound closure, 299–300

LEDI system, 191, 192

Leukoplakia, 21–22
persistent, surgical excision of, 23
proliferative verrucous, 22–23

Levator aponeurotic repair, 996–998, 999

Levator complex, 843–845

Levine and May staging system, in sinus disease, 432

Lichen planus, 28
erosive, 28, 29

Lichenoid mucositis, 28–29

Linear accelerator system, integrated computed tomography and, 387–389

Linear tomography, 307

Lipovaporization, of upper eyelids, 994–995

Lothrop procedure, modified, for endoscopic sinus image-guidance, 466, 467

Lumboperitoneal shunts, 579–580
complications of, 580

Lund-Mackay staging system, in sinus disease, 432

Lymph node, pathologic evaluation of, in sentinel lymph node biopsy, 154

Lymphadenectomy, and sentinel lymph node biopsy in, compared, 148

Lymphadenopathy, cervical, malignant, diagnostic evaluation of, 88–91
etiology of, 87–88
with primary tumor, **87–97**
prognostic factors in, 92
treatment of, 92–95

Lymphatic drainage, 842, 843

Lymphoma, anterior skull base surgery in, 118

Lymphoscintigraphy, intraoperative mapping and, 153
lymphatic mapping and, 153
preoperative, technique of, 152
science and physiology of, 151–152

M

Macrolide antibiotics, adhesion and, 1342
anti-inflammatory effects of, in chronic rhinosinusitis, **1339–1350**
antimicrobial action of, 1340
apoptosis and, 1342
cytokines and, 1341–1342, 1346
in chronic rhinosinusitis, 1303–1304, 1355–1356
clinical studies of, 1343–1344
intracellular accumulation of, 1340
long-term low-dose, in chronic rhinosinusitis, 1346–1348
patient selection for, 1346
mechanisms of action of, 1340–1343
molecular mechanism of activity and, 1343
mucociliary clearance and, 1343
oxidative burst and, 1342

Magnetic resonance angiography, in pathology of skull base, 623–625

Magnetic resonance cisternography, in cerebrospinal fluid leaks, 601

Magnetic resonance imaging, and CT, of paranasal sinuses, **1279–1299**
dynamic contrast-enhanced, 312–313
for revision surgery of skull base, 480
in cerebrospinal fluid leaks, 601
in pathology of skull base, 619–625
intraoperative, with computer-assisted surgery, 478–479, 480
inversion recovery, 310–311
low-field, intraoperative, 559, 560
of aggressive lesions, 1285–1288
of head and neck, 310–315
of paranasal sinuses, 430–431
to evaluate soft tissues, 1282, 1283
using iron oxide particles, 313–314

Magnetoencephalography brain-imaging device, 192

Major histocompatibility complex II binding, superantigens and, 1218–1219

Malar festoons, assessment of, for facial rejuvenation, 865

Malignant melanoma, CT in, 1287
cutaneous, sentinel lymph node biopsy in, 149
mucosal, anterior skull base surgery in, 117

Mandible, distraction osteogenesis of, aftercare in, 345–347
choosing device for, 339–341
indications for, 336–337
planning of, 337–339, 340
surgical technique for, 341–345

Mandibular osteotomy site, complications of, in surgery of neck, 803–804

Marcus Gunn jaw wink syndrome, 923

Marginal reflex distances, 922

Maxilla, adenocarcinoma of, evaluation of, 110, 112
and cranium, distraction osteogenesis of, 353–356
case study of, 356–357, 358

Maxillary sinus, scar band in, debris under, 538–539

Meatus, middle, endoscopic culture collection in, 1175

Medications, lichenoid reactions secondary to, 29

MEDPOR, applications of, 363
description of, 363

Meige's syndrome, 1081–1094

Meningioma(s), 761–763
skull base, modified Weber-Ferguson incision in, 789

Meningitis, as complication of acoustic neuroma, 650
bacterial, following microsurgical resection of acoustic neuroma, 659

Microarray analysis, bioinformatic techniques for, **323**–324
in cancer of head and neck, 325–327
in identification of tumor markers, 327

Microarray technology, bioinformatics and, 322–323
in otolaryngology, 324

Microscopy, in vivo, of oral mucosa, 227–228

Middle ear disease, chronic, neoplasia, and irradiation, 591

Middle ear implants, history of, 263
outcomes of, 264
technology and indications for, 263–264

Moist chambers, in dry eye, 882

Molecular and cellular engineering physiology, 189

Morsicatio buccarum, 32, 33

Mouth, cancer of, 215

Mucocele, in chronic rhinosinusitis, 1146

Mucolytics, in chronic rhinosinusitis, 1306

Mucopyocele, MT imaging of, 1281

Mucosal irritation, nasal polyposis, and staphylococcal exotoxin, 1245

Mucositis, lichenoid, 28–29

Müller's muscle, 846–847
resection and advancement of, plus tarsectomy, 998–999

Muscles, extraocular, 836–839

Mycetommas, in chronic rhinosinusitis, 1150

Myectomy, in essential blepharospasm, 1081–1094

N

Nanobiology, 279–283

Nanomedicine, 283–286

Nanoscale, 274, 278–279

Nanoscale engineering of biologic sciences, 190

Nanoscience, 274

Nanotechnology, and otology, otolaryngology, and otorhinolaryngology, 286–289
definition of, 274–275
historical perspective on, 275–277
in otolaryngology, **273–293**

Nasal cavity. See *Nose*.

Nasal douching, in chronic rhinosinusitis, 1307

Nasal mucosa, sensation of airflow by, 1166–1167

Nasal obstruction, temperature-controlled radiofrequency ablation in, 407

Nasal polyposis, human microenvironment, as xenografts in mice, 1253
massive, chronic rhinosinusitis with, medical treatment based on biology of inflammation, 1251–1253
molecular biology of, **1243–1255**
mucosal irritation, and staphylococcal exotoxin, 1245
proinflammatory cytokines produced in, 1246–1248
unenhanced axial CT imaging of, 1295, 1296
with chronic maxillary sinusitis, bacteria in, 1185–1186

Nasal septum, 831–832
reconstruction of, tissue engineering in, 209

Nasal sinuses, 830–832

Nasolacrimal duct, 827
computed tomography showing, 493

Nasopharyngeal carcinoma, recurrent, photodynamic therapy in, 250

Navigational system(s), accuracy of, registration and, 553, 554
computer-assisted, in revision endoscopic sinus surgery, **473–482**
foreign datasets for, incorporation of, 555–556
fusion technology of, 556–558
hardware of, 554–555
headsets of, 555
optical-based, visual display from, 556
surgical, use of, 552

Navigational technology, advances in, 551
next generation of, **551–562**
issues confronting, 553–561
paradigm shifts and extended applications of, 560–561
usability and affordability of, 553–554

Neck. See also *Head and neck*.
carcinoma metastatic to, with unknown primary tumor site, 87
clinically negative, management of, in squamous cell carcinoma of oral cavity, **37–46**
dissection of, elective, in squamous cell carcinoma of oral cavity, 42–43
in regional metastasiss of thyroid carcinoma, 171–172
planned, in cancer of base of tongue, 82–83

Neck (*continued*)
management of, in salivary gland carcinoma, **99–105**
radiation in, 104
surgical, 102–103
metastases of squamous cell carcinoma to, following anterior skull base surgery, 128
N0, treatment of, 102
in salivary gland carcinoma, 101
N-positive, treatment of, in salivary gland carcinoma, 100–101
parapharyngeal space, and infratemporal fossa, surgery of, avoiding pitfalls of, **795–808**
radiation of, elective, in squamous cell carcinoma of oral cavity, 42–43
surgical procedures of, nerve injury in, 798–801
treatment of, in salivary gland carcinoma, 100–104

Neomycin, in chronic rhinosinusitis, 1305

Nerve injury, in surgical procedures of neck, 798–801

Nerves. See specific nerves.

Neurectomy, peripheral facial, in essential blepharospasm, 1082–1083

Neuroblastoma, olfactory. See *Esthesioneuroblastoma.*

Neurofibromatosis type II, clinical and genetic screening for, 673–674
clinical presentation of, 672–673
evaluation and treatment of, current concepts in, **671–684**
future therapies in, 681–682
hearing rehabilitation in, 675
Manchester criteria for, 671, 672
stereotactic radiation in, 680–681
subgroups of, 671
surgical treatment of, outcomes of, 679–680
tumor size influencing, 676–679
treatment of, 675–681

Neuroimaging, in pathology of skull base, innovations in, **613–629**

Neuronavigator, 455

Neuropathy, optic, traumatic, image-guided surgery in, 487

Neurophysiologic monitoring, intraoperative, **631–642**
auditory evoked potentials and, 637–639
characterization of, 632–633
hazards of, avoiding of, 635–639
indications for, 631
standard of care, cost effectiveness, and clinical outcomes of, 633–634
utility of, 634–635

Neuroscience, and neuroengineering, 189
systems, 188–189

Neurosurgery, frameless stereotactic computer-assisted surgical navigation systems and, 422–423

Neutron radiotherapy, 382–383

Nicotine stomatitis, 27–28

Nose, additional chemosensory pathways in, 1165–1166
afferent nerves of, 1157
and sinuses, autonomic function and dysfunction of, **1155–1161**
flora of, 1178
olfactory and sensory attributes of, **1163–1170**
olfactory function of, clinical aspects of, 1167–1168
reconstruction of, tissue engineering in, 209
sensory function of, clinical aspects of, 1168–1169

Nuclear medicine, in head and neck tumors, 315–318

O

Olfaactory system, disorders of, classification of, 1167

Olfaction, loss of, etiology of, 1167
physiology of, 1164–1165

Olfactory loss, chronic rhinosinusitis and, 1167–1168

Olfactory system, anatomy of, 1163–1164

Omega-3 fatty acids, in dry eye, 880–881

Optic canal, anatomy of, 493, 496

Optic nerve, anatomy of, 494–495, 497
and orbit, decompression of, and dacryocystorhinostomy, image guidance for, 545–547
endoscopic decompression of, 500–503
location of, for decompression of, 501, 502

Optic neuropathy, traumatic, image-guided surgery in, 487

Optical coherence tomography, of oral mucosa, 228

Optical tracking devices, development of, 421

Optotrak infrared system, 455

Oral cavity, anatomy of, 38
microbial composition of, 1172–1174
squamous cell carcinoma of, 25–26
background of, 37–38
clinically negative neck in, management of, **37–46**
combined-modality treatment in, 43
diagnostic modalities in, 38–39
DNA ploidy and, 40
elective neck dissection in, choice of surgery for, 43
versus elective neck irradiation in, 42–43
epidemiology of, 37
extracapsular spread of, 40–41
future directions in treatment of, 44
management issues and options in, 38–41
management of contralateral N0 neck in, 44
observation versus elective neck treatment in, 41–42
perineural invasion and intralymphatic tumor emboli in, 39–40
prognostic factors in, 39–41
tumor size and, 39
tumor thickness and, 40
suspicious lesions of, diagnosis and management of, **21–35**

Oral mucosa, as dynamic system, 231
characterizing of, biophotonic and physical methods for, **215–240**
in vivo microscopy of, 227–228
induced fluorescence of, 224–225
infrared spectroscopy of, 225–226
lesions of, autofluorescence of, 222
diffuse reflectance spectroscopy of, 218–220
fluorescence in, 220–224
laser-induced fluorescence endoscopy in, 224
molecular markers of, 228–229
tri-modal spectroscopy in, 222–223
visual inspection of, 217–218
optical coherence tomography of, 228
physical characterization of, 215
physical properties of, methods for measuring, 229–230
Raman spectroscopy of, 227
tissue variability of, 216–217
traumatic and reactive lesions of, 31–33

Orbicularis muscle, hypertrophic, facial rejuvenation and, 863

Orbicularis myokymia, 1079

Orbit, anatomy of, 491–495
and optic nerve, decompression of, and dacryocystorhinostomy, image guidance for, 545–547
and related structures, anatomy of, **825–856**
bony anatomy of, 825–826
complications of, in chronic rhinosinusitis, 1144–1145
decompression of, in thyroid orbitopathy, 1065–1066
endoscopic decompression of, 496–500
inferior rim of, assessment of, for facial rejuvenation, 864
inferior wall of, anatomy of, 492–493
medial rim of, 826–827
medial wall of, anatomy of, 492, 494, 495
preservation of, in anterior skull base surgery, 122
soft tissues of, 833–842
surgery of, endoscopy for, 521–522
image guidance for, **491–503**
walls of, 827

Orbital fascia, 836

Orbital fat, 836

Orbital fissure, superior, 829–830

Orbital nerves, 839–841

Orbital septum, 833–834, 1010

Orbital vessels, 839–841

Oropharynx, and hypopharynx, squamous cell carcinoma of, **59–74**
cancer of, cancer of base of tongue as, 60–61
cancer of soft palate as, 61
cancer of tonsil as, 61–62
evaluation and staging of, 62
presentation of, 60–62
reconstruction of oropharynx in, 65–66
staging of, American Joint Committee on Cancer on, 64–65
treatment of, 62–66
chemoradiation therapy in, 66
surgical approaches for, 63–65

Oropharynx (*continued*)
reconstruction of, in cancer of oropharynx, 65–66
surgical anatomy of, 59–60
walls of, cancer of, 62

Ossicles, dural herniation impinging on, 589

Osteitis, in chronic rhinosinusitis, **1237–1242**
animal models of, 1237–1238
clinical studies of, 1239–1240
treatment of, 1240–1241
versus osteomyelitis, 1238–1239

Osteogenesis, distraction. See *Distraction osteogenesis.*

Osteoma, determination of margins of, image guidance for, 546–547
radiographic categories of, 1289–1290

Osteomyslitis, versus osteitis, 1238–1239

Osteotomy site, mandibular, complications of, in surgery of neck, 803–804

Otitis, viral and bacterial causes of, 1179

Otology, and nanotechnology, 286–289

Otorhinolaryngology, and nanotechnology, 286–289

Otorrhea, cerebral spinal fluid, classification of, 586

P

Palate, soft, reduction of, coblation for, 401
squamous cell carcinoma of, photodynamic therapy in, 249–250

Palpebral aperture, horizontal, measurement of, for facial rejuvenation, 861
vertical, measurement of, for facial rejuvenation, 860–861

Panendoscopy, in cervical metastasis with unidentified primary site, 91

Pansinusitis, polypoid, image-guided system in, 518, 519

Papilloma, inverted, CT of, 1288
sinonasal inverted, image-guided surgery in, 486

Paraganglioma(s), 753–754
catecholamine secretion from, 797
endovascular therapy for, 757–758
jugular, 757–758, 759–760
multiple, diagnosis of, 795–796
tympanic, 756

Paranasal sinuses, 830–832
areas surrounding, navigational systems for use in, 520
fibroosseous lesions of, CT assessment of, 1288
imaging of, advances in, **429–437**
methods of, 429–431
MR and CT of, **1279–1299**
for assessment of mucosal thickening, 1294–1295
for identification of neoplasms and entrapped secretions, 1291
in dense secretions and fungal infections, 1293–1294
to identify perineural spread, 1291–1292
tumors of, image-guided systems in, 521

Parapharyngeal space, neck, and infratemporal fossa, surgery of, avoiding pitfalls of, **795–808**

Parasympathetic nervous system, nose and sinuses and, 1155–1156

Penicillin, in acute sinusitis, 1316
protection of bacteria from, 1173–1174

Periorbita, 834–836

Pheochromocytomas, management of, 797

Phosphatidylcholine, injectable, cosmetic uses on face, **1119–1128**
discussion of, 1124–1126
materials and methods for use of, 1122–1123
results of, 1123–1124

Photochemical activation, for wound closure, 298–299

Photodynamic therapy, description of, 248–249
in otolaryngology, future directions for, 252–253
patient responses to, 250–251
selected applications of, 249–252
theory of, 248–249
of port-wine stains, 247–248

Photothermal therapy, of port-wine stains, 247–248

Pituitary, endoscopic transnasal transsphenoidal surgery of, advantages of, 731–733
and sublabial transseptal approach, compared, **723–735**
disadvantages of, 733–734
discussion of, 731–734

technique for, 723–730, 731, 732
lesions of, in children, endoscopic approaches to, 790–791
navigational systems for surgery in, 520, 521

Plain films, of paranasal sinuses, 429–430

Polyethylene glycol, in tissue engineering, 207

Polypectomy, biopsy or debridement, nasal endoscopy with, in rhinosinusitis, office-based procedures in, 1332–1333

Polyposis, extensive, altered anatomy in, 536
nasal. See *Nasal polyposis.*

Polytomography, of paranasal sinuses, 430

Polyvinyl alcohol (PVA) particulate agents, for embolization in head and neck, 740–741

Porphyrins, 281

Port-wine stains, causes of, advances in understanding of, 247
interaction of laser light with skin tissue and, 242–243
lasers for treatment of, anesthesia for, 244
effect of pulsed dye parameters on, 245–246
intense pulsed light source for, 246–247
Monte Carlo simulations of, 246
therapeutic mechanisms of, 243–244
types of lasers in, 244–245
wavelengths of, 245
treatment of, noninvasive in vivo imaging in, 247–248
photodynamic and photothermal therapy in, 247–248
recent advances in, 242–248

Positron emission tomography, and computed tomography combined system, 385–387
in pathology of skull base, 625–628
of head and neck, 315–317

Proinflammatory cells, effect of superantigens on, 1222–1223

Proliferative verrucous leukoplakia, 22–23

Proteins, and nanoengineering approach to supramolecular chemistry, 282

Proton-pump inhibitors, in chronic rhinosinusitis, 1306

Pseudoptosis, 929

Ptosis, adjustable suture surgery in, 943
ancillary examination, 932
aponeurotic, 925
classification of, 922–929
congenital, 922–925
conjunctivo-mullerectomy in, 936–937
documentation of, before surgery, 932
evaluation and management of, **921–946**
Frontalis sling in, 938–941
history taking in, 929
in third-nerve palsy, 942
levator advancement in, 933–935, 936
levator resection in, 935–936
mechanical, 928
myasthenic, 926
myogenic, 922–925
neurogenic, 926–928
of eyebrow and forehead, 947, 948
comprehensive management of, **947–984**
patient evaluation in, 949–951
physical examination in, 930–932
postoperative care in, 943–944
silicone slings in, 941–942
small incision surgery in, 943
surgical management of, 933–943
complications of, 944–945
tarsoconjunctival/superior tarsal resection in, 937–938
terminology associated with, 921–922
unilateral, 942–943
in Marcus Gunn syndrome, 942
Whitnall's sling in, 936

Punctal occlusion, in dry yee, 881

R

Radiation therapy, accelerated fractionation, hyperfractionation and, 374–375, 376–377
and chemotherapy, for organ-preservation therapy in cancer of base of tongue, 79–82
in carcinoma of hypopharynx, 70–71
electron conformal, 383–385
external beam, in cancer of base of tongue, 79, 80
plus brachytherapy, in cancer of base of tongue, 77–78
extracranial stereotactic, 381–382
for treatment of cancer of head and neck, **371–395**
fractionated stereotactic, 382
image-guided, 390
in early T1 and T2 glottic cancer, **1–9**
in early T1 glottic cancer, local control and surgical salvage for, 3

Radiation therapy (*continued*)
in early T2 glottic cancer, local control and surgical salvage for, 3
in malignant cervical lymphadenopathy, 93
in management of neck in salivary gland carcinoma, 104
intensity-modulated, 375–381
aperture-based treatment system for, 379–380
forward-planned treatment system for, 378–379
immobilization in, 380–381
inversed-planned treatment system for, 377–378
neutron, 382–383
primary, in cancer of base of tongue, 76–77

Radiesse, 367

Radiography, conventional, 1282–1285
plain-film, 307

Radionuclide cisternograms, in cerebrospinal fluid leaks, 600

Radiosurgery, stereotactic, 381–382

Radiotherapy. See *Radiation therapy*.

Raman spectroscopy, of oral mucosa, 227

Rehabilitation engineering, 190

Respiratory surface epithelium, electrophysiology of, eosinophils and, 1248–1250

Retractors, inferior, 846

Rhinitis, allergic, 1158–1159
nonallergic, 1157–1158

Rhinorrhea, cerebrospinal fluid, diagnosis and management of, **597–611**
postsurgical, prevention of, 606–607

Rhinosinusitis, acute bacterial, 1351–1352
allergic fungal, 1150, 1206
pathophysiology of, 1206–1208
chronic, acute management of, 1142–1146
adynamic factors and, 1263
algorithms for, **1143–1154**
allergy and, **1257–1266**
allergy medications in, 1360–1361
and olfactory loss, 1167–1168
and superantigens, **1215–1236**
anti-inflammatory approach to, **1351–1365**
anti-inflammatory effects of macrolide antibiotics in, **1339–1350**
antileukotriene therapy in, 1356–1357
aspirin-exacerbated eosinophilic, 1357–1358
autonomic nervous system and, 1159
chronic management of, 1146–1150
Churg-Strauss syndrome and, 1271–1272
diagnosis of, 1138
criteria for, 1312
for adult clinical care, 1145
dynamic factors and, 1263–1264
endoscopic staging system in, 1148
etiologies of, 1270–1277
extrasinus manifestations of, 1269
framework for management of, 1262–1264
gastroesophageal reflux disease and, 1257
granulomatous diseases and, **1267–1278**
immunomodulatory therapy in, 1361–1362
immunotherapy in, 1209–1210, 1359–1360
incidence of, 453
infectious diseases and, 1274–1275
inflammaatory mediators in, 1352–1354
macrolide antibiotics in, 1355–1356
management of, algorithms for, **1137–1142**
maximal medical therapy for, **1301–1310**
microbiology of, 1179–1185
studies in adults, 1184–1185
studies in children, 1183–1184
mucosal inflammation and crusting in, 1268
nasal and septal ulceration in, 1268
nasal masses in, 1268
neoplastic diseases and, 1275, 1276
osteitis in, **1237–1242**
pathophysiology of, 1181
role of bacteria in, **1171–1192**
role of fungi in, **1203–1213**
sarcoidosis and, 1272–1274
severity of, classification of, 1151
submucosal nodules in, 1268–1269

systemic symptoms of, 1269
topical anti-fungal therapy in, 1354–1355
topical intranasal therapies in, 1358–1359
treatment of, 1260–1262
changes in, 515
early endoscopic sinus surgery in, 515–516
Wegener's granulomatosis and, 1270–1271
with massive nasal polyposis, medical treatment based on biology of inflammation, 1251–1253
with nasal polyposis, superantigens and, 1226–1232
treatment of, 1141
without nasal polyposis, treatment of, 1139–1140
definition of, 1143, 1144
office-based procedures in, **1327–1338**
diagnostic nasal endoscopy in, 1330–1331
equipment for, 1329–1330
in turbinate hypertrophy, 1336–1337
local anesthesia for, 1327–1329
nasal endoscopy with biopsy, polypectomy, or debridement in, 1332–1333
nasal endoscopy with control of epistaxis, 1334
nasal endoscopy with maxillary antrostomy, 1334–1335
nasal endoscopy with sinusoscopy in, 1331–1332
practical considerations for, 1337

Rhytidosis, facial, and blepharospasm, botulinum toxin in management of, **887–902**
cosmetic background of, 895
treatment of, 895

S

Salivary glands, carcinoma of, management of neck in, **99–105**
complications of, in surgery of neck, 806
tumors of, primary, treatment of, 99

Sarcoidosis, chronic rhinosinusitis and, 1272–1274

Schwannomas, vestibular. See *Acoustic neuroma.*

Scleral show, inferior, measurement of, for facial rejuvenation, 861

Sentinel lymph node biopsy, and lymphadenectomy, compared, 148
history of, 145–146
in cancer of head and neck, **145–160**
in cutaneous malignant melanoma, 149
in head and neck, 147–151
lymphatic anatomy and, 150–151
in squamous cell cancer of upper aerodigestive tract, 154–155
micrometastases and, 150
pathologic evaluation of lymph node in, 154
prognostic information provided by, 149–150
risks of, 153–154
technique of, 153–155

Shoe sole, for prevention of neuropathy in diabetic patients, 193–196

Sigmoid sinus, injury to, during ear surgery, 717–718

Silastic, for soft tissue implants, 362

Silicone soft tissue implants, 362

Silk suture and liquid coils, for embolization in head and neck, 741

Sinogenic pain. See *Sinusitis, acute, pain in.*

Sinonasal undifferentiated carcinoma, anterior skull base surgery in, 117–118

Sinus, and nose, autonomic function and dysfunction of, **1155–1161**
benign tumors of, resection of, CT for guidance of, 541–543
frontal, disease of, computer-assisted surgery in, 476
drainage of, anatomy of, 461–462
endoscopic and external surgical approaches to, 464
endoscopic approaches to, image-guidance for, for frontal sinusotomy, 465–466
frontal sinus drillout procedure for, 466, 467
preoperative planning for, 464–465
external approaches to, for image-guided surgery, 467–470
identification of, in child, 509, 511
obliteration of, endoscopic, 469–470

Sinus (*continued*)
image-guidance in, 467–469
frontal recess of, 462
inflammatory disease of, CT guidance in surgery of, 539–541
malignant tumors of, resection of, CT for guidance of, 543–545
normal flora of, 1178–1179

Sinus content cultures, obtaining of, while avoiding normal flora, 1174–1176

Sinus puncture, fro specimen collection, 1174–1175

Sinus surgery, computer-aided, domain of, 439–440
computer-assisted endoscopic, indications for, American Academy of Otolaryngology Head and Neck Surgery and, 506, 507
computer-assisted functional endoscopic, in children, **505–513**
consensus panel guidelines for, 505, 506
indications for, 506–509
surgical procedure for, 510–512
endoscopic, 429–430
complications of, 473
medicolegal outcomes and, 523
early, for treatment of chronic rhinosinusitis, 515–516
in facial pain, 1314
management following, 1142
revision, computer-assisted surgical navigation in, **473–482**
routine, image-guided systems in, 517–518
teaching cases of, 520
frontal, drillout operations, image-guided systems for, 519–520
image-guided. See *Image-guided sinus surgery, frontal sinus.*
revision, image-guided systems for, 519–520
image-guided. See *Image-guided sinus surgery.*
image-guided systems in. See *Image-guided system(s).*
navigational systems for, 516–517
electromagnetic, 516, 518
in revision surgery, 518–519

Sinusitis, acute, antibiotics in, 1312
facial pain in, diagnosis and management of, **1311–1325**
pain in, examination in, 1315
history taking in, 1314–1315
investigations in, 1315
medical treatment of, 1315–1318
midfacial, 1319–1320
surgical treatment of, 1318–1319
acute bacterial, imaging in, 1284
allergic fungal, altered anatomy in, 536
image-guided surgery in, 485–486
with erosion of sinus cavity, 508, 509
chronic, acute exacerbation of, bacteria in, 1186–1187
bacterial biofilms in, **1193–1201**
future perspectives on, 1199–1200
impact of, 1193
in sphenoid sinus, 509, 510
Pseudomonas in, 1194
revision surgery for, after computer-assisted surgery, 478
treatment of, in 1984, 429
chronic maxillary, with nasal polyposis, bacteria in, 1185–1186
dynamics of, 1181–1182
facial pain in, 1311, 1312
frontal, brain abscess from, 541
imaging technology to stage, 431–433
in children, adenoidectomy in, 506
medical management of, 505
surgical management of, 505–506
recovery of bacteria from sinuses in, discrepancies in, 1176–1177
staging system in, future directions in, 434–436
proposals for improving, 433
requirements of, 433
viral and bacterial causes of, 1179

Sinusotomy, frontal, 465–466
revision of margins of, 540–541

Skin tissue, interaction of laser light with, in port-wine stains, 242–243

Skull base, aneurysmal disease of, 765–767
anterior, reconstruction of, with alloderm, 138–139
surgery of, **107–131**
approaches for, 107–108
areas of controversy concerning, 121–125
assessment of cribriform plate and dura for, 109–110
bifrontal craniotomy approach for, with limited transfacial incision, 119–120

without supplemental skin or mucosal incisions, 120
chemotherapy and, 126
complications of, 125–126
endoscopic approach without craniotomy for, 121
goals of, 107
in adenocarcinoma, 115–116
in adenoid cystic carcinoma, 116
in angiofibroma, 118
in chordoma, 117–118
in esthesioneuroblastoma, 116–117
in lymphoma, 118
in mucosal melanoma, 117
in sinonasal undifferentiated carcinoma, 117
in squamous cell carcinoma, 115
limits of resectability for, 110–111
orbit preservation in, 108, 109, 110
orbito-zygomatic approach for, 121
plus irradiation, results of, 127
preoperative clinical and radiologic assessment for, 111–114
protection of internal carotid artery in, 108–109
radiation therapy and, 126
recurrent disease following, treatment of, 127–128
subcranial approach for, 120
supplemental midfacial degloving intraoral incision for, 120–121
surgical approaches for, 118–121
surgical anatomy of, 108–111
tumors of, anterior craniofacial resection in, 133–134
endoscopic management of, **133–144**
blood vessels of, embolization of, concepts and techniques of, 738–739
bony reconstruction of, indications for, in anterior skull base surgery, 124–125
hypervascular tumors of, 753–756
image-guided procedures of, **483–490**
clinical uses of, 484–486
surgical technique for, 486–490
meningioma of, modified Weber-Ferguson incision in, 789
pathology of, computed tomography in, 614–619
CT angiography in, 617–618
CT perfusion studies in, 618–619
evaluation of bony anatomy in, 616–617
MR angiography in, 623–625
MR imaging in, 619–625
constructive interference steady-state sequences in, 620–621
magnetization-prepared rapid gradient echo sequences in, 621–623
neuroimaging in, current state of, 613–614
innovations in, **613–629**
positron emission tomography in, 625–628
three-dimensional reconstruction in, 616, 617, 618
pediatric, diagnostic and surgical challenges in, **773–794**
fibro-osseous lesions of, management of, 787–789
pathology of, cases illustrating, 781–792
developmental issues in, 776–777
differential diagnosis of, 774–775
technologic innovations in, 778–779
positron emission tomography/CT imaging of, 627
revision surgery of, magnetic resonance scan for, 480
surgery of, dysphagia and dysphonia following, treatment of, **809–817**
rerouting of facial nerve in, **685–710**
tumor(s) of, evaluation in, 810–816
image-guided systems in, 521
recurrence of, response to therapy and, 627
vascular anatomy of, and anastomoses of, 737–738
vascular lesions of, elective and presurgical carotid occlusions of, 764–765
endovascular prospective of, **737–771**
preoperative embolization of, 763–764

Sleep apnea syndrome, obstructive, temperature-controlled radiofrequency ablation in, 407–408

Sleep-disordered breathing, temperature-controlled radiofrequency ablation in, 406–407

Sluder's syndrome, 1312–1313

Smell, preservation of sense of, in anterior skull base surgery, 121–122

Smokeless tobacco, effects on oral mucosa, 27

Soft palate, cancer of, 61

Soft tissue, MR to evaluate, 1282, 1283

Soft tissue filler(s), Autologen as, 365–366
bovine collagen as, 364
Cymetra as, 366
Dermalogen as, 366
hyaluronic acid as, 364–365
hydroxyapatite as, 367
Isolagen as, 365

Soft tissue implants, AlloDerm, 363
and fillers, **361–369**
approval of, 361
autologous, 362
Gore-Tex, 362–363
ideal, 361
materials for, 361–362
silicone, 362

Spectroscopy, diffuse reflectance, of lesions of oral mucosa, 218–220
infrared, of oral mucosa, 225–226
near-infrared, 190
Raman, of oral mucosa, 227
tri-modal, in lesions of oral mucosa, 222–223

Speech, and voice, evaluation of, following skull base surgery, 815–816

Speech language pathologist, in treatment of dysphagia and dysphonia following skull base surgery, 812, 814–815

Speech therapy, and swallowing therapy, in skull base tumors, 814–815

Sphenoid, dehiscent carotid in, in allergic fungal sinusitis, 537
teratoma of, 776, 777

Sphenoid sinus, fibrous dysplasia of, tumor resection and optic nerve decompression in, 543–544
in chronic sinusitis, 509, 510

Sphenopalatine neuralgia, 1312–1313

Squamous cell carcinoma, anterior skull base surgery in, 115
of oral cavity. See *Oral cavity, squamous cell carcinoma of.*
of oropharynx and hypopharynx, **59–74**
of upper aerodigestive tract, sentinel lymph node biopsy in, 154–155

Staphylococcal exotoxin, mucosal irritation, and nasal polyposis, 1245

Stereotactic computer-assisted surgical navigation, **535–539**

Stereotactic computer systems, frameless, 420–422, 424

Stereotactic image-guided surgery, 439, 453–454

Stereotactic radiosurgery, 381–382

Stereotaxy, framed, 420

Steroids, in acute sinusitis, 1316
in chronic rhinosinusitis, 1301–1302

Stomatitis, nicotine, 27–28

Strabismus surgery, in thyroid orbitopathy, 1066–1067

Stromal eosinophilia, ulcerative granuloma with, 31–32

Stryker Navigation System, 425

Sulcus, superior, measurement of, for facial rejuvenation, 861–862

Superantigens, and atopic dermatitis, 1223–1225
and major histocompatibility complex II binding, 1218–1219
asthma and, 1225
bacterial, structure of, 1216
chronic rhinosinusitis and, **1215–1236**
chronic rhinosinusitis with nasal polyposis and, 1226–1232
costimulatory molecules for, 1219
description of, 1215–1216
effects on target cells, 1222–1223
functional properties of, 1220–1221
in human disease, 1223–1225
mechanism of action of, 1217

Surgical dissection techniques, alternative, **397–411**

Swallow, evaluation of, following skull base surgery, 815–816
in tumors of skull base, 810–811

Swallowing therapy, and speech therapy, in skull base tumors, 814–815

Sympathetic nervous system, nose and sinuses and, 1156–1157

Systems neuroscience, 188–189

T

T-cell receptor binding, superantigens and, 1219

T-Lymphocytes, effect of superantigens on, 1222

Tarsal strip, lateral, suspension of, 1002–1003

Tarsoligamentous band, 1033

Tarsus, 843

Tear film, anatomy and physiology of, 871–873
aqueous layer of, 872
increased evaporation of, dry eye in, 874–875
lipid layer of, 873

Tear secretion, decreased, dry eye in, 874

Tegmen, injuries to, during ear surgery, 719–720

Temperature-controlled radiofrequency ablation, applications of, 406–408
complications of, 408
description of, 405–406

Temporomandibular joint dysfunction, following surgery of neck, 807

Teratomas, nasal, surgical approaches to, 783

Tetracyclines, in dry eye, 882–883

Three-dimensional imaging, of paranasal sinuses, 431

Thrush, 30

Thyroid carcinoma(s), differentiated, contemporary management of, **161–178**
distant metastases of, 174
history and physical examination in, 162
invasive, treatment of, 169–170
"microcarcinoma," 165
operative treatment of, 166–172
papillary and follicular, diagnosis of, 164
staging of, TNM staging for, 167
treatment of, 164–165
postoperative treatment and follow-up in, 172–174
preoperative evaluation in, 165
prognosis in, 174–175
regional metastasis of, incidence of, 171
neck dissection in, 171–172
radiologic imaging of, 171
risk analysis in, 166
staging of, 165–166

Thyroid disease, treatment of, in thyroid orbitopathy, 1059–1060

Thyroid nodule, evaluation and management of, 162–164

Thyroid orbitopathy, blepharoplasty in, 1068
classification of, evolution of, 1047–1049
clinical evaluation of, 1049
diagnosis of, 1047–1058
and management of, **1043–1074**
differential diagnosis of, 1058
eyelid abnormalities in, 1050–1052
histopathology of, 1044–1045
incidence of, and patient demographics in, 1045–1047
lid-lengthening surgeries in, 1067–1068
medical management of, 1058–1064
indications for, 1058–1059
mild, medical treatment of, 1060–1061
moderate to severe, medical treatment of, 1061–1064
myopathy and, 1052–1054
orbital apex compression in, 1054–1055
orbital decompression in, 1065–1066
orbital imaging in, 1056–1057
pathophysiology of, 1043–1044
soft tissue features of, 1049–1050
strabismus surgery in, 1066–1067
surgical management of, 1064–1068
treatment of thyroid disease in, 1059–1060

Thyroid scan, indications for, 164

Thyroidectomy, in thyroid carcinoma, 168, 170

Thyroplasty, Type I, 813

Tinnitus, bion microstimulator in, 268
pathology of, 266
sensorineural, 267
transcutaneous electrical stimulation in, 267

Tinnitus suppression devices, 266–268

Tissue adhesive, for embolization in head and neck, 741–742

Tissue engineering, 188
cell-based therapies and, **199–214**
cellular aspects of, 201–202
challenges of, 199–200
clinical aspects of, 202–203
concept of, 199, 200
in auricular reconstruction, 208–209
in nose and nasal septum reconstruction, 209
of facial skeleton, 210–211
of larynx and trachea, 209–210
polymeric scaffolds for, 203
bioactive molecules of, 204
compatibility of, 204
degradability of, 204
in situ-forming, 206–208
prefabricated, 204–206

Tissue fusion, inductive, for wound closure, 301–302
seamless, for wound closure, **295–305**

Tissue welding, laser, for wound closure, 299–300

Tobacco-pouch keratosis, 27

Tobacco-related lesions, oral, 26–28

Tomography, optical coherence, of oral mucosa, 228

Tongue, base of, cancer of, 60–61
cancer of base of, management of, **75–85**
external beam radiation plus brachytherapy in, 77–78
external beam radiation therapy in, 79, 80
primary radiation for, 76–77
primary surgery for, 77, 79
results of, 77–79
organ-preservation therapy using radiation and chemotherapy, 79–82
planned neck dissection in, 82–83
quality of life in, 83
staging of, 75–76
craterlike ulcer of, 32

Tonsil, cancer of, 61–62

Tonsillectomy, coblation for, 400–401
harmonic scalpel for, 403–405
in work-up of unknown primary tumor, 91

Trachea, tissue engineering of, 209–210

Trachoma, 906
upper lid in, 905–906

Transblepharoplasty eyebrowpexy, 960–961

Transconjunctival blepharoplasty, 999–1000, 1001

Transconjunctival fat transposition, 1000–1001, 1002

Transcutaneous electrical stimulation, in tinnitus, 267

Transoral laser excision. See *Laser excision, transoral.*

Transpositional flap, for reconstruction of lower eyelid, 1037–1039

Trichloroacetic acid peels, of lower eyelids, 1005

Trochlea, 838

Tumor(s), primary, site, diagnostic evaluation of, 89
unknown, cervical malignant lymphadenopathy with, **87–97**

Tumor markers, identification of, microarray analysis in, 327

Turbinate, inferior, 832

Turbinate hypertrophy, office-based procedures in rhinosinusitis in, 1336–1337

Turkey test, 195

U

Ulcerative granuloma, with stromal eosinophilia, 31–32

V

Vagus nerve, and tumors of skull base, 810–811
deficits of, treatment of, 812–813
injuries of, 809–810

Vascular lesions, of face, advances in treatment of, 242–248

Velopharyngeal incompetence, treatment of, 814

Ventriculoperitoneal shunts, 580–5811
complications of, 581

Verrucous carcinoma, 24–25

Videolaryngoscopy/videostroboscopy, in tumors of skull base, 811–812

Viewing Wand (ISG), 423, 455

Voice, and speech, evaluation of, following skull base surgery, 815–816
assessment of, in tumors of skull base, 812

Voice quality, following radiotherapy in early T1 and T2 glottic cancer, 4

W

Warm compresses, in dry yee, 881

Wegener's disease, 508

Wegener's granulomatosis, chronic rhinosinusitis and, 1270–1271

Wickham's striae, 28, 29

Wound closure, energy-based, 298–301
modern adhesives for, 296–298
seamless tissue fusion for, **295–305**
traditional, 295–296

Z

Zygomatic process, 829
